Florianópolis, SC, Brazil

eduardo kegler1@gmail.com

48984148966

**Passionate about building reusable front-end architectures and driving innovation.**

Expertise in React, TypeScript, GraphQL, and agile development, with a proven track record of improving performance, system reliability, and user experience.

## Experience

**Senior Software Engineer at Coinbase, San Francisco**

August 2021 — Present

- Led frontend implementation of third-party OAuth authentication for Sign in with Apple & Google at Coinbase.
- Designed and delivered the App Switcher, used by 0.45% of retail web users to navigate across Coinbase products like HelpCenter, Coinbase Tracer, and Commerce, improving cross-product engagement.
- Spearheaded the development of Unified Signup 2.0, optimizing onboarding process and integrating Sign Up with Apple and Google.

**Software Engineer at Tech6, Florianópolis**

June 2019 — August 2021

- Designed and developed an internal design system, later used to redesign and rebuild the company's main website, improving UI consistency and scalability.
- Built new frontend features, including an automated invoice generation system for all transaction participants, enhancing platform efficiency.
- Developed and maintained a real estate platform using TypeScript, React, and GraphQL, while conducting code reviews and unit tests to ensure high-quality development.

**Junior Software Engineer at Todobit Soluções em Sistemas, São José**

August 2018 — August 2019

- Developed and maintained work-safety software using JavaScript and PHP (Laravel) to improve system reliability for third-party clients.
- Optimized legacy code, reducing system crashes and improving response times by 14%.
- Collaborated with cross-functional teams to implement new features and enhancements for the software.

**IT's Intern at Santinvest S.A. - Sistema Financeiro, Florianópolis**

September 2017 — August 2018

- Developed Corporate University Moodle platform using PHP to enhance internal training accessibility.
- Provided technical support for hardware and software issues, ensuring seamless operations.
